

After you have implemented our Compliance Enabler © for GDPR readiness you will:

- Have the ability to identify, classify, amend and mask personally identifiable information.
- Receive alerts and monitoring of areas of risk
- All staff responsible for or who come into contact with personally identifiable information will be correctly trained on the new regulation.
- Reporting process will be in place if a breach occurs. You will have the ability to proactively report and manage a breach within 72 hours.

Your organisation will be prepared for and compliant with the new GDPR!

Don't wait until it is too late!

Talk to us today about how we can help you become GDPR compliant well before May 2018.

COMPLIANCE ENABLER ©

A modular and scalable compliance tool

The EU's GDPR will be enforced from May 25th, 2018. The time to prepare is now otherwise you risk a €20 million and your credible reputation.

The road to compliance begins with

AQOVIA 

Did you know?

If your organisation enters or processes personal data of EU citizens or has staff operating with the EU you will need to comply with the GDPR.

The EU's new General Data Protection Regulation (GDPR) is coming in May 2018 and means business. The new regulation will give citizens control of their personal information and will unify personal data management for EU members aiming to simplify the regulatory environment for international business. Any organisation that gathers and uses personally identifiable data needs to act now and comply with the new strict privacy and protection legislation. GDPR also addresses export of personal data outside the EU.

**GDPR will become law on
25th May 2018!**

In relation to personal data management, the new GDPR will require your organisation to:

1. Update processes and procedures relating to storage and use.
2. Appoint a Data Protection Officer (DPO).
3. Educate all staff on the new regulation, how to handle data and how to act in the situation of a data security breach.
4. Utilise technology to ensure personal data is maintained and safely stored, used appropriately, secure and protected.

Ignoring the GDPR is a mistake

Regardless of whether you are a multinational, large or small organisation non-compliance with the GDPR leads to hefty penalties with serious brand merit and financial consequence.

A fine of up to €20m or 4% of global annual turnover, whichever is greater will be issued.

A breach of fine can lead to serious reputation damage. Are you prepared to risk your brand reputation and credibility?

Aqovia's Compliance Enabler ©

Compliance Enabler © is a modular regulatory compliance and business intelligence solution that will prepare you for the GDPR. Our solution is modular, flexible and scalable to provide complete GDPR compliance in one or more areas of your business.

Our Compliance Enabler will provide you with the necessary means to ensure your organisation becomes GDPR compliant in less than 2 months!

Our approach is simple, clear and methodical. Most importantly we deliver results in a time and cost efficient manner.

By implementing our Compliance Enabler © you will not only be able to manage your risk of GDPR breach exposure but also manage other compliance and regulatory standards – industry specific, sovereign or international.

What you get!

For ease of use and efficiency your personalised Compliance Enabler © will be accessible and fully functional from a single dashboard application. This includes:

- Data Governance Compliance Tool
- Company policy and procedure updates to integrate the new regulation requirements.
- Required staff education and training modules and tracking.
- Ongoing management and monitoring of data and regulatory compliance.

It doesn't end here! Once you are prepared for the GDPR you can take your Compliance Enabler to the next level. Why not add Business Analytics to your solution and extract valuable insights from your stored data that will drive competitive strategic decision-making.

You will always have access to and a view of your organisations regulatory and sovereignty technology and administrative compliance status in real-time. Additionally your operational procedures in relation to data management will all feed into this system ensuring it is always current and up to date.
